Professional profile

Adaptable professional with six years of combined experience in entrepreneurship, consulting, client delivery, retail and design. Led a U.S. business serving clients across industries and coordinated teams to turn requirements into practical solutions. Brings customer service, business judgment, organization and analytical skills backed by technical fluency.

Experience

Founder | Skyline Dynamics Inc.

Mar 2025 - Sep 2026 | Dover, Delaware, USA; remote from Cobourg, ON

- Founded and led a U.S. software company, generating US\$300,000+ in earned revenue and securing US\$500,000+ in signed contract value.
- Managed business setup, tax/admin, client relationships, project scope and delivery.
- Served U.S. startups, Series A/B/C companies and established businesses across healthcare, real estate, automotive, fintech, fashion, e-commerce, software and government/security-related work.
- Delivered front-end, back-end, integrations, AI/ML and DevOps work tailored to clients' operational needs.
- Projects included property interfaces, automotive payments and vehicle showcases, healthcare/EHR components, and full-stack e-commerce platforms.

Software Consultant | BISON ONWARD CONSULTING CENTER LLC

Mar 2024 - Sep 2026 | Los Angeles, CA | Remote | Contract

- Advised healthcare, e-commerce, insurance and real-estate clients; translated meetings and requirements into practical plans and recommendations.
- Delegated developer tasks, communicated priorities, coordinated agile sprints and kept client teams aligned through meetings, documentation and progress discussions.
- Contributed front-end and back-end code, system integrations and project documentation while balancing client needs with implementation details.

Software Developer | Upwork

Apr 2023 - Jun 2025 | Cobourg, ON | Remote | Freelance

- Delivered full-stack client projects, turning briefs into reusable interfaces, back-end functionality and connected workflows for prototypes and production applications.
- Built with React, Next.js, Node.js, Python, FastAPI and GraphQL; communicated with clients about requirements, implementation choices and revisions.

3D Designer | Fiverr

Apr 2020 - Jul 2024 | Ontario | Remote | Freelance

- Generated more than CA\$15,000 in sales as a top-rated freelance 3D designer, translating client briefs into custom visual assets.
- Created environments, architectural assets, creatures and individual models for video games, graphics and client projects; produced models and textures with Blender.

Experience (continued)

Store Advisor | Sport Chek

Apr 2023 - May 2024 | Ontario | On-site | Part-time

- Helped customers compare products and find suitable sporting goods and apparel, combining product knowledge with attentive, practical service.
- Processed transactions and supported inventory, merchandising and day-to-day store operations as part of a retail team.

UI/UX Design Intern | Second Bind

Nov 2023 - Jan 2024 | Cobourg, ON | Remote

- Designed wireframes, prototypes, interface components and visual assets for a business focused on reuse and responsible material handling.
- Used research, usability testing and feedback to refine layouts and interfaces.

Selected projects

AI Study Companion | Repository

University of London final project. Built a browser-based study tool that turns documents, recordings and images into source-linked summaries, questions and flashcards.

WoW-Pro Guides | Repository

500+ merged pull requests to a community project: maintained guides, corrected Lua errors and compatibility issues, and responded to community bug reports.

Education

University of London | BSc Computer Science

Sep 2023 - 2026 | Coursework, credits and final project complete; results and formal degree award pending (December 2026).

University of Toronto Mississauga | Computer Science & Economics

Sep 2022 - Aug 2023 | GPA: 3.62 | Transfer coursework; no degree awarded.
