Professional profile

Business owner and consultant with six years of combined experience in client delivery, team leadership, retail and design. Led international teams, managed financial and administrative responsibilities, and served U.S. clients across industries. Brings customer service, planning, communication and analytical judgment, supported by hands-on design and technology expertise.

Business capabilities

Client consulting / Team leadership / Budgeting / Forecasting / Agile delivery / Office management

Experience

Founder | Skyline Dynamics Inc.

Mar 2025 - Sep 2026 | Dover, Delaware, USA; remote from Cobourg, ON

- Founded and led a U.S. software company, generating US\$300,000+ in earned revenue and securing US\$500,000+ in signed contract value.
- Led an international team of 15-20 specialists, coordinating technical delivery and client work across U.S. startups, Series A/B/C companies and established businesses.
- Managed finances, budgeting, forecasting and financial planning and analysis, alongside business setup, legal administration and taxes.
- Delivered front-end, back-end, AI/ML, integrations and DevOps work: property interfaces, vehicle showcases and payments, healthcare/EHR components, and e-commerce platforms.
- Joined client conference discussions about quarterly and annual priorities and gave improvement-focused talks, connecting business goals with practical delivery decisions.

Software Consultant | BISON ONWARD CONSULTING CENTER LLC

Mar 2024 - Sep 2026 | Los Angeles, CA | Remote | Contract

- Advised clients across industries, using meetings and conference discussions to identify requirements, summarize priorities and recommend practical improvements.
- Helped clients prioritize business spending and technology investments by discussing implementation options, operational needs and trade-offs.
- Delegated developer tasks, coordinated agile sprints and kept client teams aligned through documentation and progress discussions; also contributed front-end and back-end work.

Experience (continued)

Software Developer & Agency Lead | Upwork

Apr 2023 - Jun 2025 | Cobourg, ON | Remote | Freelance agency

- Led an agency of 8-10 specialists covering front-end, back-end, AI/ML, DevOps and project prospecting, with estimated agency revenue of US\$50,000.
- Consulted with clients, pursued project opportunities, defined requirements and coordinated team responsibilities and delivery across varied engagements.
- Built full-stack applications and reusable interfaces with React, Next.js, Node.js, Python, FastAPI and GraphQL; handled integrations and back-end functionality.
- Discussed implementation choices, revisions and project progress with clients, translating their needs into tasks for the agency team.

3D Designer | Fiverr

Apr 2020 - Jul 2024 | Ontario | Remote | Freelance

- Generated more than CA\$15,000 in sales as a top-rated freelance 3D designer, translating client briefs into custom visual assets.
- Created environments, architectural assets, creatures and individual models for video games, graphics and client projects; produced models and textures with Blender.
- Worked with clients and project partners to refine style, scope and revisions and deliver assets suited to their intended use.

Store Advisor | Sport Chek

Apr 2023 - May 2024 | Ontario | On-site | Part-time

- Helped customers compare products and find suitable sporting goods and apparel, combining product knowledge with attentive, practical service.
- Processed transactions and supported inventory, merchandising and day-to-day store operations as part of a retail team.

UI/UX Design Intern | Second Bind

Nov 2023 - Jan 2024 | Cobourg, ON | Remote

- Designed wireframes, prototypes, interface components and visual assets for a business offering reuse, recycling, donation and liquidation services.
- Used research, usability testing and team feedback to refine layouts, presentation and navigation for clearer customer-facing experiences.

Selected projects

AI Study Companion | Repository

University of London final project. Built a browser-based study tool that turns documents, recordings and images into source-linked summaries, questions and flashcards.

WoW-Pro Guides | Repository

500+ merged pull requests to a community project: maintained guides, corrected Lua errors and compatibility issues, and responded to community bug reports.

Education

University of London | BSc Computer Science

Sep 2023 - 2026 | All credits and final project complete; results and degree award pending (expected December 2026).

University of Toronto Mississauga | Computer Science & Economics

Sep 2022 - Aug 2023 | GPA: 3.62 | Transfer coursework; no degree awarded.
